

源码如下

```
1 <?php
2   show_source("10.php");
3   echo '<br>';
4   require 'flag.php';
5   error_reporting(0);
6   if(eregi("hackerDJ",$_GET[id])) {
7       echo("<p>not allowed!</p>");
8       exit();
9   }
10
11   $_GET[id] = urldecode($_GET[id]);
12   if($_GET[id] == "hackerDJ")
13   {
14       echo "<p>Access granted!</p>";
15       echo "<p>flag: $flag </p>";
16   }
17   ?>
```

仔细读一下代码，

就会发现这道题十分简单，将关键词二次url编码即可

payload:

```
1 ?id=%2568%2561%2563%256B%2565%2572%2544%254A
```
